SUMMARY

Undergraduate software engineering student with 1+ year of experience at SenzMate IoT Intelligence delivering React/TypeScript front-ends and API integrations. Trusted as a flexible team player and emerging leader who learns fast and unifies diverse perspectives to execute. Interested in applying analytical problem solving and solid programming fundamentals to drive business outcomes?

SKILLS

Front-end	React, TypeScript, JavaScript (ES6+), Material UI, React Native, Angular, HTML5, CSS3, WordPress
State/Architecture	Component composition, Context API, design patterns, scalable front-end structure
Back-end / Integrations	RESTful APIs, Node.js (familiar: Spring Boot)
Databases	MongoDB, MySQL (basic exposure: PostgreSQL)
DevOps & Tools	Git/GitHub, Docker, CI/CD, AWS (S3/EC2 basics)
Practices	Agile/Scrum, code reviews, unit testing, clean code, documentation
Soft Skills	Team player, Problem-solving, Leadership, Flexibility, Fast learner, Critical thinking

WORK EXPERIENCE

Software Engineer Trainee—SenzMate IoT Intelligence, Colombo, Sri Lanka Oct 2024—Oct 2025

- Built and maintained production front-ends for DMS, UMS, and Polar using React (TypeScript/JavaScript), Material UI, and Angular; delivered responsive and accessible UIs across desktop and mobile.
- Implemented WhatsApp notifications: designed Spring Boot REST APIs for templated messages (alerts, onboarding, updates), including retry logic, rate limiting, and delivery status webhooks.
- Created reusable UI components and hooks, improved load times, and UX consistency; collaborated with back-end and QA to ship features reliably.
- Contributed to authentication/authorization flows and robust form/data validations aligned with product requirements.

ACADEMIC & PERSONAL PROJECTS

ITPM—AI Voice to Text Integration Jan 2025—Jun 2025

Java, MongoDB, React, LLM, Git. Integrated speech-to-text with LLM-backed summarization and persistence; built a simple React dashboard for uploads and transcripts.

PAF—Team Collaboration Management System Jan 2025—Jun 2025

Java, MongoDB, React, Git. Implemented task boards, role-based access, and notifications; focused on clean component structure and reusable hooks.

Agriculture Resource Management System Jan 2024—Jun 2024

Django, HTML/CSS/JS, MySQL, React. CRUD modules for farmers, resources, and schedules; responsive UI and basic analytics.

Online Movie & Serial Browsing System

Jul 2023 – Nov 2023

Java (JSP), HTML/CSS/JS, MySQL. Search/browse the catalog, user auth, and watchlists.

Online Grocery Shop System

Feb 2023 – Jun 2023

PHP, HTML/CSS/JS, MySQL. Product management, cart/checkout, and order tracking.

Math-Game & Utilities (Age Calculator, Music Player, etc.)

Apr 2024 – Oct 2024

HTML/CSS/JS, React. Series of mini-projects exploring UI patterns and state management.

Online Text Summarization

Sep 2024 – Oct 2024

Python, React, JavaScript. Client-side upload with server-side NLP pipeline for abstractive summaries.

Online CV Checker

Sep 2024 – Oct 2024

Python, React, JavaScript. JD-aware scoring, suggestions, and optional PDF report export.

EDUCATION

Present—Jul 2026 **BSc (Hons) in Software Engineering**, SLIIT (Malabe)
2020 **GCE A/L, Biology**, Kokuvil Hindu College (3 passes)

CERTIFICATES

- Data Visualization with Power BI
- Front End Development (HTML)
- Java Programming; OOP in Java
- Statistics for Machine Learning
- Azure: Describe Identity, Access, and Security; Azure Load Balancer Configuration
- AWS: Introduction to S3; Networking Concepts; Connecting VPCs; Auto-Healing and Scaling Applications

AREAS OF INTEREST

Full-Stack Development | Web Development | UI/UX | Front-end Development | AI/Deep Learning
